

## RISK MANAGEMENT POLICY

Risk management is the process whereby authorities methodically address the risks associated with what they do and the services which they provide. The focus is to identify what can go wrong and take steps to avoid this or manage the consequences. Good risk management allows stakeholders to have increased confidence in the authority's corporate governance arrangements and its ability to deliver its priorities.

Risk management is not just about financial management; it is about protecting the achievement of objectives set by the authority to deliver high quality public services. The failure to manage risks effectively can be expensive in terms of litigation and reputation and can impact on the ability to achieve desired outcomes. The authority generally and members individually are responsible for risk management.

Risk management is an ongoing activity that comprises four elements:

- identifying risks
- assessing risks
- addressing risks
- reviewing

### IDENTIFYING RISKS

In order to manage risk, an authority needs to know what risks it faces. Identifying risks is therefore the first step in the risk management process. Stoke Gifford Parish Council has identified the following key risks to successfully achieving its priorities and service objectives.

- Assets
- Finance
- Liability
- Administration
- Employer Liability
- Legal Liability
- Councillors Propriety

### ASSESSING RISKS

The key risks identified above have been assessed for the potential consequences of a risk occurring (impact) and consider how likely this is (likelihood). The assessment of potential impact and likelihood are then used to arrive at a risk assessment for each risk of high, medium or low. The risk assessment enables the Parish Council to decide which risks it should pay most attention to when considering what measures to take to manage them.

<b>Likelihood</b>	<i>Highly Likely</i>	Medium	High	High
	<i>Possible</i>	Low	Medium	High
	<i>Unlikely</i>	Low	Low	Medium
		<i>Negligible</i>	<i>Moderate</i>	<i>Severe</i>
		<b>Impact</b>		

## ADDRESSING RISKS/RISK REGISTER

<b>AREA: ASSETS</b>		
<b>RISK</b>	<b>LEVEL</b>	<b>CONTROLS</b>
Protection of physical assets	M	Buildings, and property insured. Value increased annually by RPI. Reviewed annually along with inspection of assets
